

Sustainable Supply Chains

RESPONSIBLE SHOPPING

Many of today's consumers are trying to be responsible shoppers, choosing products made with ingredients that are good for both the planet and people. Many expect the same level of responsibility from food producers.

Some of the most important aspects for consumers who consider sustainability to be important are:¹

Conserving the Natural Habitat

Conserving Farmland Over Multiple Generations

Less Food and Energy Waste

say they are willing to pay more for sustainable brands.²

50%
of Americans

say it's important for food to be produced in a sustainable way.¹

4 in 10
Americans

want to know how their food is produced.¹

1 in 3
Americans

thinks it's important for a food company to share their personal values.¹

BUILDING TRUST ACROSS OUR SUPPLY CHAIN

Cargill is working with farmers, government, industry groups, customers and consumers to make the future of food more sustainable. We believe the private sector has an important role to play in addressing climate change, protecting natural resources and improving food security.

We're committed to sourcing sustainably produced corn and soy in major supply chains worldwide. We collaborate across both industries to promote best practices and improve sustainability.

Protecting Sensitive Environments

Reducing Greenhouse Gas Emissions

Creating Responsible Working Conditions

Advancing sustainability across corn supply chains

We understand the risks and issues with growing corn, and work on continuous improvement areas that are relevant for the farmer, customer and the environment.

[LEARN MORE >](#)

Promoting sustainable practices across soy supply chains

We have been working to reduce deforestation related to soy production since 2001. We promote sustainable practices to meet the world's growing demand for soy.
